Common Questions & Answers:

Q: What does Durt™ taste like?

A: Taste is something that many people can experience differently. Durt products can be mixed with any beverage and should not impact how they taste. When drinking Durt with plain water, many find that it doesn't really change how it tastes at all, and if it does, it's usually described as tasting like spring water.

Q: What should I expect to experience or feel when taking Durt™ products?

A: The effects of Durt black are often subtle and realized over time. The first thing most people observe is that they are more hydrated. Noticeable differences in hydration can be found in your appearance by looking at your skin, wrinkles, veins, etc. You may also detect positive changes in your energy levels and mood.

Q: What gives Durt™ black its coloring?

A: There are no artificial colorings added to the Durt products. Durt black's color comes from humic acid which is naturally dark.

Q: Can I add Durt to beverages other than water?

A: Yes, Durt concentrate ampoules can be added to protein shakes, tea, coffee and many other drink options.

Electrolytes are essential minerals. If following the Keto Diet, it is often recommended to consume electrolytes to off-set the flushing effect caused from consuming low glycemic carbohydrates.

Q: Can I add Durt™ products to hot beverages too?

A: Absolutely. You can add Durt concentrate to both hot and cold beverages without impacting quality.

Q: What is the best time of day to take Durt™ products?

A: Durt products can be consumed at any time for increased health and vitality.
